

Transition to a **zero** carbon future.

A monthly discussion group
the first Monday of each month
6.30-8.30pm Monday May 5th!
First Floor 24-26 Hope St, Brunswick VIC 3056

Guest speaker: Dr. Patrick Moriarty,
leading energy and transport researcher and academic.

Beyond Zero Emissions is
a not-for-profit, climate change campaign group.

We endorse the latest scientific findings that there is already
too much greenhouse gas in the atmosphere, and that it must be
reduced to below current levels in order to decrease the probability
of sudden, irreversible and catastrophic climate change.

According to Prof. James Hansen, Director of the Goddard Institute of
Space Studies at NASA, **dangerous tipping points have already
been crossed.**

The transition to a zero carbon economy is not only an urgent necessity,
it is entirely achievable using **existing technology.**

The discussion group exchanges information and ideas to
transform Australia into a zero carbon economy
as quickly as possible.
